PHYSICAL FITNESS TEST

Town of Addison, Texas

BACKGROUND

The Addison Police Department, in recognizing the importance of physical fitness status for job performance, has established physical fitness standards for applicants and incumbent officers. The department conducted a validating study to determine what areas of physical fitness are important for doing the job of an Addison law enforcement officer and what level of fitness is necessary to perform the strenuous and essential functions of the job. You will be expected to meet the physical fitness test standards when entering the department and to maintain the position of police officer.

WHAT IS PHYSICAL FITNESS?

Physical fitness is having the physical readiness to perform the strenuous and critical physical tasks of the job. The physical fitness areas that have been determined to be the underlying factors for your capabilities to do the job consist of seven specific and different areas.

- 1. Aerobic power or cardiovascular endurance.** This is having an efficient heart and cardiovascular system so that you can perform physical tasks over a sustained period of time. It is an important area for performing job tasks such as making foot pursuits and long-term use of force situations.
- 2. Anaerobic power.** This is having the ability to make short intense bursts of effort. This is an important area for performing job tasks such as short sprint pursuit situations.
- 3. Upper body absolute strength.** This is having the upper body strength to make maximal efforts against a resistance. This is important for performing physical tasks that require lifting, carrying and pushing.
- 4. Upper body muscular endurance.** This is having the capability to make repeated muscular contractions with the upper body without getting fatigued. This is important for many uses of force job tasks.
- 5. Trunk of abdominal muscular endurance.** This is having the capability to make repeated muscular contractions with the abdominal area without getting fatigued. Your abdomen is the fulcrum of your body and is important in many tasks involving lifting, pulling and dragging.
- 6. Leg explosive strength or power.** This is having the capability to jump with power. This is important for performing many tasks such as jumping over obstacles and running up and down stairs in pursuit situations.
- 7. Agility.** This is having the ability to make quick movements with sprinting. This is important for making movements and changes of direction around obstacles during pursuits.

There are other areas of physical fitness to include: (1) flexibility and (2) body composition of % body fat. Those areas are important for overall fitness; however, they have not been determined to be predictive of how well an individual can perform the duties of an Addison police officer.

WHY IS PHYSICAL FITNESS IMPORTANT?

First, physical fitness is important because the seven physical fitness areas determine an individual's capability to do strenuous job tasks. Physical fitness is a bona fide occupational qualification (BFOQ)

Secondly, physical fitness is important to minimize health risks for health problems such as heart disease, stroke and obesity – all of which can affect job performance capabilities.

HOW WILL PHYSICAL FITNESS BE MEASURED?

There are six physical fitness tests that will be given in one day as a battery of tests. The tests are as follows:

1. **1.5 mile run** – This measures aerobic power or cardiovascular endurance, the ability to have stamina over time. The test consists of running/walking as fast as possible the distance of 1.5 miles.
2. **300 meter run**- This measures anaerobic power or the ability to make an intense burst of effort for a short time or distance. The test consists of sprinting 300 meters as fast as possible.
3. **One Repetition Maximum (RM) Bench Press**- This measures the absolute strength of the upper body. The test consists of lying on a bench and pushing up as much weight as you can one time.
4. **Maximum push-up test**- This measures the muscular endurance of the upper body. The test consists of doing as many push-ups from the front, lean and rest position with no time limit.
5. **1-minute sit-up test**- This measures the abdominal or trunk muscular endurance. Lying on the ground, you will be given one minute to do as many bent leg sit-ups as you can.
6. **Vertical jump test**- This measures leg power. The test consists of jumping up on a wall and marking how high you jump from a standing position.

WHAT TEST STANDARDS MUST I MEET?

Each test is scored separately and you must meet the standard of each and every test. The standards are as follows:

TEST	STANDARD
1.5 mile run	17:48
300 meter run	73.8 seconds
1RM bench press	Push 67% of your body weight
Maximum push-up	20
1-minute sit-up	32
Vertical jump	13 inches

You will be given the tests in the following sequence. There will be rest periods between each event.

1. 1 RM bench press
2. Vertical Press
3. Push-ups
4. 300-meter run
5. Sit-ups
6. 1.5 mile run
